

Services and Visit Preparation Guide

Synthetic knowledge-base document for RAG testing. Version 1.0 - August 2026.

Important

This clinic and all service details are fictional. This document is not medical advice. Preparation requirements vary; always follow written instructions from qualified clinic staff.

Document purpose

A consistent sample source for administrative FAQ answers, retrieval testing, service descriptions, preparation checklists, and safe human handoff.

General rules for every visit

- Arrive about 10 minutes early.
- Bring photo ID, insurance details if applicable, and any referral or order.
- Bring an up-to-date medication and allergy list.
- Tell staff if you need language, mobility, hearing, vision, or other access support.
- Service-specific written instructions take priority over this demo guide.
- Do not fast, restrict fluids, or change medication based only on this document.
- Urgent, symptom-related, treatment, and medication questions must go to a human-controlled flow.

Safety boundary

The receptionist chatbot may answer administrative preparation questions only. It must not diagnose, assess symptoms, prescribe, recommend treatment, or interpret results.

Service description and preparation

General consultation

RAG metadataService code: **CONSULT-01**

Keywords: consultation, clinician visit, follow-up, records review

A planned non-emergency conversation with a clinician to review existing information and agree on appropriate next steps.

Before the visit

- Write down the questions you want to discuss.
- Collect relevant prior reports.
- Continue routine medication unless qualified staff gave different instructions.

Bring with you

- Photo ID and insurance information if applicable.
- Medication and allergy list.
- Referral and prior reports if relevant.

After the visit: Qualified staff explain any next steps; booking alone does not confirm a diagnosis or treatment plan.

Service description and preparation

Routine laboratory collection

RAG metadataService code: **LAB-01**

Keywords: laboratory, blood draw, sample collection, fasting

Collection of a sample that has already been ordered by an authorized clinician. The collection team does not choose which tests are needed.

Before the visit

- Check the written order for exact preparation.
- Do not assume fasting is required; fast only when explicitly instructed.
- Do not change medication or fluid intake unless qualified staff instruct you.

Bring with you

- Photo ID and laboratory order.
- Insurance information if applicable.
- Written preparation instructions.

After the visit: Result timing and interpretation must come from qualified staff.

Service description and preparation

Diagnostic ultrasound visit

RAG metadata	Service code: IMG-US-01 Keywords: ultrasound, sonography, imaging order, scan preparation
--------------	---

A non-emergency imaging appointment based on an existing order. Preparation varies by body area and exact exam.

Before the visit

- Confirm the exact ultrasound type on the order.
- Follow only exam-specific written eating, drinking, bladder, or clothing instructions.
- If instructions are missing, contact the clinic rather than guessing.

Bring with you

- Photo ID, imaging order, and prior imaging reports if available.
- Written exam-specific instructions.

After the visit: A qualified clinician reviews and explains results; the chatbot does not interpret images.

Service description and preparation

Plain X-ray visit

RAG metadataService code: **IMG-XR-01**

Keywords: x-ray, radiography, imaging, metal items

A scheduled radiography visit based on an existing order. Imaging staff confirm the requested body area and required safety checks.

Before the visit

- Wear clothing that is easy to adjust around the requested area.
- Tell imaging staff about any possibility of pregnancy before imaging begins.
- Do not remove medical devices or change medication based on this guide.

Bring with you

- Photo ID and imaging order.
- Previous imaging reports if requested.

After the visit: Staff explain how results are released but reception does not interpret them.

Service description and preparation

Physical therapy initial assessment

RAG metadataService code: **PT-01**

Keywords: physical therapy, physiotherapy, mobility, rehabilitation

An introductory visit where a qualified therapist reviews the referral, goals, and relevant limitations.

Before the visit

- Wear comfortable clothing that allows ordinary movement.
- Bring referral restrictions or recent reports.
- Do not attempt new exercises based only on this document.

Bring with you

- Photo ID, referral, and prior reports.
- Medication list and existing clinician instructions.

After the visit: The therapist provides individualized instructions and explains whether follow-up is appropriate.

Service description and preparation

Vaccination appointment

RAG metadataService code: **VAX-01**

Keywords: vaccination, vaccine, immunization, vaccine record

A preventive appointment where qualified staff review eligibility, records, consent, and clinic policy before vaccination.

Before the visit

- Do not change medication based on this guide.
- Contact staff in advance about accessibility or eligibility questions.
- Allow time for check-in and any staff-directed observation.

Bring with you

- Photo ID, insurance information, and vaccination records.
- Requested consent documents.

After the visit: Qualified staff provide the official record and individual after-visit instructions.

Service description and preparation

Behavioral health intake

RAG metadata	Service code: BH-01 Keywords: behavioral health, mental health, intake, private appointment
---------------------	---

A planned non-emergency introductory conversation to collect background information and explain service boundaries.

Before the visit

- Complete securely supplied intake forms.
- Choose a private setting for a remote appointment when possible.
- Prepare provider contact details only if you choose to share them.

Bring with you

- Photo ID and intake documents.
- Insurance and referral information if applicable.

After the visit: Symptom assessment, crisis language, treatment, and medication questions must be routed to humans.

RAG response policy	Use this document only for administrative service descriptions and preparation. Cite the service code, do not invent missing facts, and hand off when confidence is low or the question is medical.
